

Digital Printing Services

Custom printing for all your photographic and fine art needs
Available at **Gastonart & Frame**

The Printer

Our Canon iPF8400 produces professional quality imagery with a wide color gamut and vivid color reproduction. Canon's twelve color pigment-based ink system and a resolution of 2880x1440 dpi produces images with precision detail and unmatched brilliant color.

The Media

From single sheets to rolled media, the 8400's 44" width allows us to create large format prints on a variety of papers and canvas with virtually no size limitations.

The Inks:

We use only LUCIA EX pigment inks. The high-density pigments produce a high color gamut with professional print permanence. Designed with black & white images in mind, UltraChrome inks produce quality black & white images with no color crossover or color cast. Epson inks provide light fastness for over 75 years for color and 200 years for black & white.

Media Type	Product Description and Specifications**	Price per sq/in (1-2,000)	Price per sq/in (2,000-5,000)*
Epson Enhanced Matte Art Paper [44" Roll]	(10.3 mil thickness) The flat matte surface and high color gamut yields quality color reproduction. The heavyweight thickness delivers a photographic feel. An inexpensive option and perfect for photographs, fine art prints and posters.	\$0.09	\$0.08
Epson Premium Luster Photo Paper [44" Roll]	(10 mil thickness) Professional grade paper that produces vivid lifelike images that rival traditional photographic papers. Perfect for wedding photos, school pictures and professional prints.	\$0.12	\$0.10
Epson Premium Canvas Matte (Includes Clear Star Satin coating) [44" Roll]	Cotton(35%) / Polyester(65%) Blend. This heavyweight canvas produces high quality photographic prints and fine art reproductions with archival durability. Perfect for reproducing acrylic or oil paintings. Clear Star coating is optional and included at no additional charge.	\$0.15	\$0.13
Epson Hot Press Bright & Cold Press Bright (Watercolor) [44" Roll]	(100% Cotton Fiber. 17mil thickness 330gsm. Acid and Lignin Free, PH Buffered) This bright white watercolor paper produces high quality fine art prints with rich color saturation and bright highlights. Perfect for reproducing watercolors and printing restored antique photos.	\$0.14	\$0.12
MOAB Metallic Photo Paper [44" Roll]	Designed for photographers seeking to enhance their images with a metallic look, Slickrock Metallic Pearl 260 transforms an image into lifelike, almost 3D quality. The paper's high gloss and unique sheen make this ideal for everyday prints with a twist. Slickrock papers capture the original beauty of an image with a metallic enhancement.	\$0.14	\$0.12
